

Communication Cards for Children & Adults

Communication cards are used to assist EMS, emergency triage and healthcare providers in communicating with nonverbal and non-English speaking patients and their families.

- History taking and assessment
- Pain, mechanism of injury
- Explanation of treatments
- Procedures and testing
- Discharge instructions

Available in multiple languages:
English/Spanish and English/Haitian Creole

The 18 cards use emojis to explain a particular topic or aspect of medical care.

Great for EMS, clinical settings and hospitals!

Cards are attached on a ring clip and made of durable material that can be cleaned and used with a dry erase marker.

Download your own copy by scanning below or call 904-244-4986 to request hard copies!
